

OCEANSIDE UFSD
WATER TESTING UPDATE: PHASE II
NARRATIVE: 1/4/2017

On December 28, 2016, the District received preliminary results from Phase 2 lead testing. As you may recall phase 2 water quality testing included samplings from outlets not typically used for drinking such as classroom sinks, bathroom sinks, custodial slop sinks, chemistry labs, external hose bibs, etc. A number of tests from these water sources exceeded the threshold and require action to ensure the health and safety of our students and staff. Our environmental consultant has advised us to temporarily turn off and/or post signage at these locations while remediation efforts take place over the next several weeks.

The following pages contain a listing by school of impacted locations and remediation efforts . This listing has been posted to the District website.
